BLUE BUTTON is a flush mounting door unlock push button with single C-NO-NC contact specifically designed for clean environments.

The button is fixed on a steel front panel covered with a blue adhesive membrane resistant to the mostly used sanitization agents.
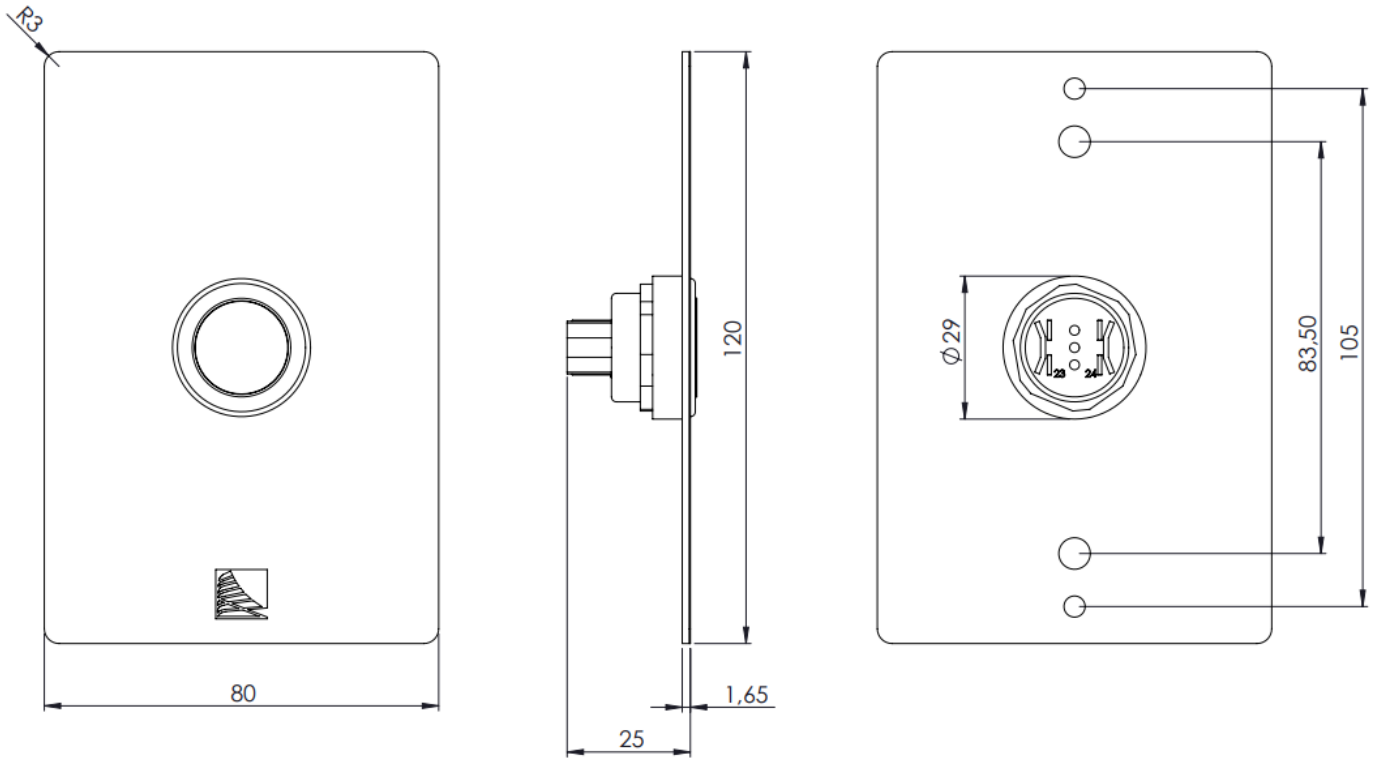

CE

TECHNICAL CHARACTERISTICS

Mechanical features	Painted steel or INOX frontal panel AISI 304 covered by a special adhesive cover
Protection degree	IP54 if correctly mounted and sealed
Size	Frontal panel: 80,0 x 120,0 x 1,5 mm Device: 80,0 x 120,0 x 25,0 mm
Contacts	voltage-free contact; faston connection
Mechanical life	1 million operations
Actuator stroke	3mm
